#### HTTP запрос - метод POST

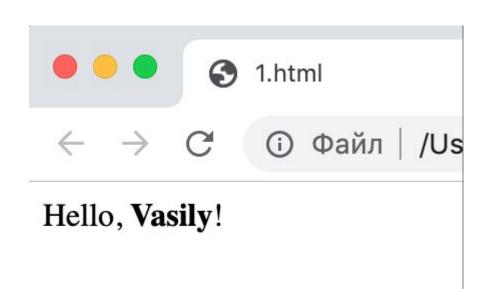

login=rvasily&password=123456

```
POST /login HTTP/1.1
Host: e.mail.ru
Content-Type: application/x-www-form-urlencoded
Content-Length: 29
```

#### HTTP ответ

```
HTTP/1.1 200 OK
Server: nginx
Content-Language: ru
Content-Type: text/html; charset=utf-8
Content-Length: 48
Connection: close
Set-Cookie: session=1234; expires=Mon, 08 Oct 2029 21:22:57 GMT; path=/; domain=.mail.ru
X-ETime: 0.026
<html><body>Hello, <b>Vasily</b>!</body></html>
```

#### HTML

#### CSS

```
<html>
    <head>
        <link ... href="style.css">
    </head>
    <body>
        <b class="green">Vasily</b>!
    </body>
</html>
```

```
.green {
    color:green;
              1.html
               ① Файл
Vasily!!!
```

#### **JSON**

```
"messages": [
        "id": 123456,
       "from": "v.romanov@mail.ru",
       "title": "Новые задачи",
        "read": true
   { ... }
```

#### Итого #2

HTML - что должно показываться

CSS - как должно выглядеть

JavaScript - интерактив - что будет если нажать на кнопку

JSON - данные для js
